Project Title:

Smart Task Management System

Proposed Features:

Type of user: 1. Admin, 2. Manager, 3. Employee, 4. Viewer

1. Admin Role

Admin controls the whole system.

Features

- Add / Edit / Delete Users (Full CRUD)
- Manage User Roles (Admin, Manager, Employee, Viewer)
- User Authentication (Register, Login, Password Reset)
- View User Activity Logs
- Generate / View Sales & Task Reports
- Global Dashboard Overview

2. Manager Role

Manager handles task planning and team oversight.

Features

- Create / Edit / Delete Tasks (Full CRUD)
- Assign Tasks to Employees
- Set Due Dates and Priority Levels
- Define Task Dependencies
- Manager Dashboard Overview

3. Employee Role

Employee executes and updates assigned tasks.

Features

- View Assigned Tasks
- Update Task Status (Pending, In Progress, Completed, On Hold)
- Add / Edit / Delete Task Comments (Full CRUD)
- Upload / Manage Task Attachments
- View Task Details (Deadlines, Priorities, Instructions)
- Employee Dashboard Overview

4. Viewer Role

Viewer monitors progress and participates in team collaboration.

Features

- View Project Dashboard (Read-only)
- View Task Status and Details
- Create / Edit / Delete Collaboration Posts (Full CRUD)
- Read Team Discussion Board
- View General Reports & Analytics
